ALUMINUM HEAT SINKS & MOTOR BODY

CUSTOM MADE
ALUMINUM
EXTRUSIONS
AND
SURFACE FINISH

Aluminium heat sinks provide hydraulic qualities to cool different areas and parts of a particular engine or machine. They also protect the devices from exposure to high temperatures.

In particular, Aluminium Motor Body, also called aluminium motor enclosure, is a kind of aluminium shell with the extrusion forming, which can be used to place instrument measuring tools and other applications.

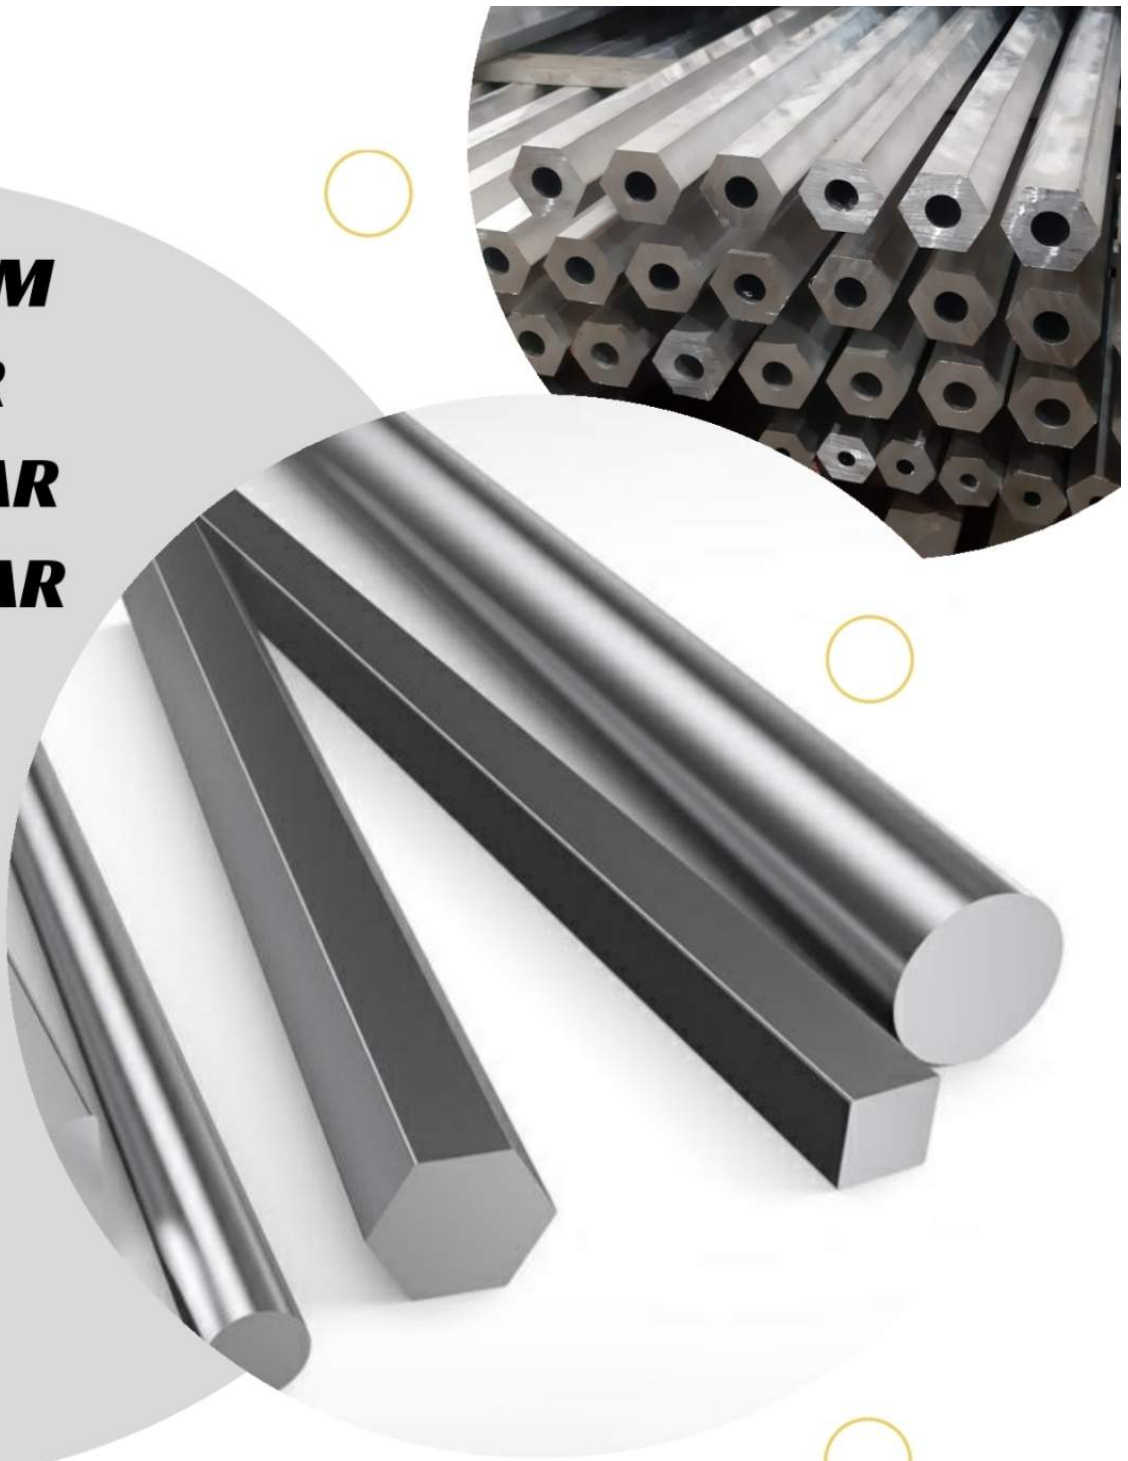

Your single-solution from concept to finished product
